What I mean by passive residual income online?

It's simply mean that do the job once and get paid several time or even forever. To make money online you need to complete some tasks, I'm not talking about online jobs, those tasks are mostly marketing. Generally it take time and hard work to make money online, especially if you don't have the knowledge and experience, but eventually if keep trying, learn and do the work you will start seeing profits.

The profit could be an affiliate commission, ad space, or even by selling your own products and/or services. The success will be when you make the sale, no matter how big your commission is.

But unfortunately, in most cases you need to repeat the process, next month and months after to generate the income, same income or maybe higher.

With passive residual income you will be paid for the sale more than once, so your income will be increasing every month and even when you stop the work the money will keep coming.
