Help Me Make Money Online

An e-mail I have received from Frank an [SFI affiliate](#) who joined my team lately, and he just send me a small sentence "**Help Me Make Money Online Please**".

Usually it takes me between 15 to 30 minutes to reply to all my members who contact me for specific help. But with frank I went blank and did not know what to answer. It's not a hard question for me, not when I am making thousands of dollars monthly from the internet using the power of affiliate marketing and network marketing.

But to get to this point it took me more than 3 years of hard work, losing money, and learning. But I want him to do so in a few days.

When someone earn a commission of as little as \$50 even if he spent a lot of time or even money to get this commission it will be a huge success, the first commission is the biggest success online.

So how can I help frank make money online, and as fast as possible?

It really not easy to answer this question, if I want to recommend affiliate marketing; it's not an easy to explain and it will need books to pass the information.

The affiliate marketing is a process of having an affiliate offer (like an article or review) then drive traffic (targeted traffic) to that offer.

The hard part here is to drive traffic, and with today's competition it is very hard to get free traffic to your pages.

Let me show an example:

Let's say I want to promote a forex product, Forex is one of the best affiliate niches that create thousands of dollars on affiliate commissions. Here are the steps I went through:

1. Research the affiliate offer I want to promote. I used Google keyword tool to research the term "Forex", I found 2 great forex offers I can promote with high commission. The first one is "forex robots or forex expert advisor" the second one is "Forex Signals". Some good forex robots could get me up to \$100 commission per sale, but it's only once per each sale. However with some forex signals I can generate a \$35 commission but it's a recurring commission. So I choose "forex signals"

2. Now I need to review the offer, honestly to review each product I usually use the product, purchase it and see what they deliver, this way I can review the offer honestly. Then I wrote a short page reviewing the service.

3. Now I want to generate traffic using the search engines, so I need to research the keywords and the competition. Again using google keyword tool and Google search engines I found some terms related to forex signals with low completion.

A good keyword is the one that have more than 1000 searches per month with less than 1,000,000 results, and the results on the first page are not higher than PR2, or an average of PR2.

This will give better chances to reach Google first page for that term. So I choose "Accurate Forex Signals" that have a 1900 monthly searches with 757,000 results with average of PR 1.5 of the first page.

4. Now I have my page, I have my affiliate offer, and I have my search term. So first of all I will optimize the page to my term (by having the term on the title, description and inside the content using H tags).

5. I put the page online, and now I want Google to index the page, so I bookmark the page using all the bookmark services I use. I also have a very powerful software that help me index any page in seconds and start driving traffic to my pages fast, it's a software developed by Ewin Chia a super affiliate, and his software is more than great it's the "[All In One Online Marketing Software](#)"

6. Now we need to build some links to that page to increase popularity and page PR, but at the same time we can generate traffic to that page, so obviously I used my article marketing services, that is my secret tools to promote any page I have. So I wrote 2 articles and used these tools to promote my articles. My link building services are

[Unique Article Wizard](#) & [Free Traffic System](#).

That's it, you can keep writing article and posting them using step 6 over and over again, you can also get more creative by linking to your page from related forums, blogs and blog comments, social network, and videos and always link back to your page using the term you choose as the anchor text.

Now go to Google and Search for the term "[accurate Forex signals](#)" my page is the second result.

This page generates more than \$500 in affiliate commission monthly and increasing because it generates a recurring commission with a momentum of the new sales.

I could start a new website with a domain "accurate forex signals" and reach Google first result, but I already have too many website and too many domains that I sometimes forget about.

There are some software that help you optimize this process, and generate affiliate commissions faster like [Income Entourage](#) or [Instant Cash Empire](#).

This is the only honest way for Frank to help him make money online, there are some other ways that will require harder work and more time, but with the same principle. I may share with you later.
