Commission Autopilot Honest Review

You may have heard all the buzz about the [Commission Autopilot](#) software, it was and still the hottest selling software for two month, 12/2011 and 01/2012, and I think it will keep being the first for the coming month.

I had purchased this software and I really like it, and I will share with you here my honest review and reveal to you how this software work, even when I know the owner will not like my review because you know they make a huge selling only by not revealing exactly how their software work.

Again most of the money making software, or any other products that claims to make money for you, they do not reveal anything about the software, they want you to believe first and purchase without knowing exactly what the software is and how it works.

[Commission Autopilot](#) is simply 2 software the first is commission activator that it's main job is to create content for you, the second one is the commission multiplier that really make the work.

So how does th

is software work?

Simply you need to have an affiliate offer and affiliate link, then you create a related content with the first software, add your affiliate link, then create PDF files. Then the second software will automatically submit the PDF file to content sharing websites.

Content sharing website are one of the most visited sites online, and attract a lot of people seeking information, and you can get your content and links in front of thousands interested readers daily. Your content will be free for them to read and they will be interested for more so they will click your links.

Because I love to have my own content, I write my own articles and then have a link to one of my pages and use the software to submit my own content with my own links. This software is great traffic generation software, build high quality back links for my sites and it is very cheap.

I also have the Limitless Profits program, this program create e-books and automatically insert my own affiliate links into those e-books. So I started to use the commission autopilot software to promote e-books I created with the [Limitless Profits](#) program, and honestly those two programs together are a great compensation for making money online with affiliate marketing.

Also the Commission Autopilot team have created a very helpful videos with great tips and ideas on how to effectively use their software.

Finally let's sum thing out:

Does [Commission Autopilot](#) software make money instantly? NO.. Definitely not, It is a long term marketing software, it help generate traffic, and build back links, and it really could make money directly but you need to use it a lot and create a lot of content, you can use the content generation software, But I don't believe on duplicate content.

Is it good software? For marketing and link building it is a great software, most content sharing sites have high

authority and high traffic pages, and having your links on those sites are a huge boost to your ranking and traffic.

Does it require work or additional investment? It does require a lot of work but it is worth it, and no it need no additional investment but I really recommend the [Limitless Profits](#) with it.
