Affiliate Store

Away to make money from home with affiliate programs.

One of the best ways to make money online is by having your own niche affiliate store. And selling unique products that you have nothing to do with its creation, packaging and delivery, you don't even process any order. You have only to bring these products in front of people interested in them, and then they will purchase from your own domain name and make the whole process of buying the product from your store. But you are not the one who accept the orders but the company whom you are affiliated with.

Affiliate store is exactly like having your own store, and selling products online without the expenses required to handle orders, and effort required to handle customer support. Taking advantages of both words customers who will give you their money and suppliers who will give you their products and arrange the entire business requirement for you and for free.

BUT

Nothing is that good; no one will give you his money if he is not at least 90% sure you are recommending the some of the best products on the market, and he need to know that you or the company behind are trust worthy. In the other hand no company will pay you a commission that could reach up to 50% of the product value if there is no work required from you side.

That mean you need to affiliate with good companies if not the best within your niche market; and by good I mean they must have a great product that solves your customers problem, with competitive prices and good management and customer support.

From your side, you need to reach customers interested in such products, that what we call marketing (affiliate marketing in this case), in most cases your company will give you the affiliate store completely designed and ready to work and process orders. But you need to do all the marketing.

So to make money with your affiliate store you need to learn and practice affiliate and internet marketing the best way possible.

As a beginner you can use paid advertising like Pay Per Click, but you need to work as hard as you can to make your business suck customers for free in the future, so after a few months your affiliate store will reach a point of making money with very few effort from you. And for that you need Search engine Optimization, (do it your self will be the best choice, so learn SEO and practice it) and you need to have a links to your store from every possible website related to your niche.

Here are some examples of affiliate stores you can have.

A health related affiliate store, health is by far the best number one in demand subject, with millions of products online. Health related products are the best sellers online today so it's highly recommended. But you need to know that health cannot be considered as a niche, because it's very wide area. To have a health niche affiliate store you need to concentrate on a sub-category of the health like women's health, sexual health.

The best ready to work health affiliate store are:

[Herbal biz from market health.](#)

Market health is a health related affiliate network; you can join and promote their products for free. But it also have a unique option which provide its affiliate with their own customized affiliate store, they host that store for you for free with your own domain name. They have some of the best health products on the net today and they are the number one health affiliate program.

You need to chose a good (keyword optimized) domain name, and sign up with them [here for your own health affiliate store.](#)

Here is an example [Sexual and women's health](#)

It's our best favorite choice.

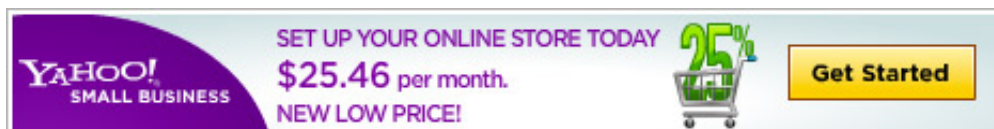

Other health related affiliate store that had been created by a professional doctor, [health biz in a box](#), the store itself has a very professional look and design. The only disadvantage of this affiliate store is that it is very popular and wanted and you can find some affiliate stores that look exactly the same. But in the other hand this same reason can indicate that this affiliate store is very successful, I can recommend it but in the end it's your choice.

And here two recommended ways to build niche affiliate store

The first is [BeBiz](#) which was created by one of the most successful affiliates on the business, this guy know internet marketing, know how to conquer a niche in the online business world. Not only he know how to do it he also know how to teach it, that what pushed him to make a program to duplicate his success and build a program that can help make your own success in the online business niche market.

The last option is to get an online store with [Yahoo online store](#); I have no idea about this one but also recommended it because I know some internet marketers who made huge success with it.

If you have any experience with affiliate store, or niche business you are invited to share it with us.
