Make Money Fast and Free

How to make money online fast and free? And by free I mean with no investment what so ever.

This is a very legitimate question people are asking in order to have some idea or way to make money online without any expenses and as fast as possible. We can list hundreds of ways to make money online fast, but it will require some investment, such as having your own website, selling affiliate products through Pay Per Click advertising or promoting [network marketing opportunities](#). But there are some people who would like to make money online without any money spent and they have their own reasons.

When I started to receive this question, I had no idea what to answer, and finally I passed this question to the guy who helped me all the way in my money making business online, the Arabian-Affiliate. And that's what he said:

"The best way to make money fast and free at the same time is by using the social network free pages to sell affiliate products.

"Choose a topic that you can write about, and then build a page with a social network site like Squidoo about that topic; recommend some affiliate products (you can promote one product per page) on this free page. Then use free traffic generation strategies to drive traffic to that page and you can make affiliate sales if you can drive quality targeted visitors to that page"

And he explained how he thinks the best free way to promote those pages:

Social bookmarking, share your pages with your friends on social bookmarking sites and ask them to bookmark your pages for you, this way search Engines will index your page and start rank it.

After that use article marketing to promote this page, with article marketing you can get direct hits and build back links to your page. This way you can increase traffic and increase page rank and maybe start to receive hits directly from the search engines.

Use any free way to get traffic like forums, press release videos, and traffic exchange.

The more time you invest to promote your page the higher it will rank and the more hits you will get. And if you do everything right you could make some good sales and earn great commission. After that you can start all over again with new topic and new products.

To explain this idea better I asked him to write some kind of report on his website "the [Home Business Guide](#)" and try to explain the strategy step by step so any one can do it, easily and fast.

So if you are interested in making money fast and free read this report he called it –[How to make money online without a website](#)–.

If you have any question or idea to share with us please feel free to post it in the comments.
