# **How I Started My Part Time Work From Home Business**

I hesitate to much before I decide to finally tell you about jossef, but I feel I have to now.

Jossef Sal is the owner of the [Home Business guide](#) known also as The Arabian Affiliate, additional to many other smaller websites. He is now one of the most successful affiliate marketers especially with niche marketing.

Although he is still running an offline business and honesly I have no idea why, he also don't know why, but I am sure he will close this business soon.

Offline business requires more effort, more hard work and time a lot of time, if he invest this time on his online business he could generate 10 times more money than he is making now.

He is not known on the internet because he is only connected to his team (and I am honnered to be one of them) and to knew internet marketers, he never contacted any of the Gurus and famuse affiliate marketers and network marketers.

The amazing thing about this guy is that he is always there to help.

Her is my story.

When I first was introduced to the home business idea and trying to make money with affiliate marketing and network marketing, I thought to myself it is impossible. But when reading some of the articles posted on the [Home Business Guide](#) he make it so easy and everyone can do it.

I liked the information in that site even when I hated how it looked, but it was very valuable information, so I decided to contact the webmaster and ask a simple question.

Is the idea of making money online real and what it take for me to make money? I also told him that I have no money to invest at all.

After about 3 days I got a reply from Jossef himself with 2 pages of explanation how affiliate marketing work and what can I do to make money with it absolutely without any investment, I felt he was honest and he really knows what he is talking about. I wanted to learn more about this subject and from different point of view so I made a search online about home business, affiliate marketing, and work at home.

I found some good websites with good information, and tried to do the same to contact the webmasters and see how they can help me. But this time only one of them replied and she was trying only to make me sign up for a program she worked with and she only explained how amazing her program is and how easy I can make money with this program. And yes she succeeded to convince me to join and I have even upgraded to gold membership that cost me \$46 per month.

This membership website was suppose to help me understand affiliate marketing and niche affiliate marketing. It

was a little bit helpful but I could not keep paying the \$46.

I wanted something fast to make me succeed and start make money really fast.

After more than 5 months from the day I contacted Jossef, I forgot about him at all, But when I made a search on Google about “niche affiliate marketing” The first result was <http://www.niche-affiliate-marketing.net>

In that page they were talking about a free system that will make money, The term FREE made me sign up, but I did not get any thing, I started to receive e-mails telling me that to get the system I need to join a program, and it will cost me a hosting only so they will build a website for me and teach me how to promote the website.

It was my final attempt and I contacted the webmaster of that site for more explanation.

Surprisingly it was Jossef again, and he also replied with great information.

In the five months I spent more than \$700 on online video courses to teach me how to make money online with affiliate marketing and what is niche affiliate marketing, but later I was getting all that information and more from Jossef personal emails. And he helped all the way, he even built this blog for me, I made some changes later but I think I will ask him again to help redesign it.

He also put me as an admin for the website [Niche affiliate marketing](#), but I cannot make it work the way he does.

His Idea was.

" I only want to work with serious people, very serious, who do not expect to get every thing done automatically for them. Those who will contact and keep asking for help and information are serious, and they will be the most successful. They need the information and the first push but they will work very hard to implement the information and keep moving forward".

Now he is making money from my effort because I am promoting affiliate products from affiliate programs he told me about, so he is earning a 2 tier affiliate commission. I am also promoting network marketing opportunities that he recommended and I also promote some opportunities that I am not member with, for him.

He helped me greatly and I will do Any thing to help him back if I could.

Honestly You will not find this kind of help, not free anyway, on the internet.

I also know a single mom called Rebeka Who also had a success story with the help of Jossef and maybe I will write her story here.
