2 Great Secret Ways To Make Money Online

The existence of hundred ways to make money online is leading people especially newbies to quit trying to make money online even before starting.

There are two clear facts on the money making industry online:

1. There are so many opportunities online claiming you can make a lot of money with, some even go further by claiming you don't need to do anything in return. This cause newbies and entrepreneurs to jump from one opportunity to another, encouraged by some statements of internet and network marketers who knows exactly what to say to attract you to their opportunity.
2. Too may scams, opportunities that their main purpose is to scam people and literally steal their money. These hypes are causing of a black shadow on the other legitimate and honest money making opportunities.

I want here to share with you two ways to make money online, you will see that these two are logically accepted, and every one can do it with no experience in internet marketing and without the need of having your own website or blog, even though I strongly recommend having your own website or blog on the internet.

The first way to make money online is [network marketing and profit sharing opportunities](#) with the help of social networking sites. I know it's not a secret anymore but I have seen how others are doing it and I can see it's really the wrong way.

So what is this money making method.

Joining a network marketing opportunity or an honest legitimate profit sharing opportunity and try to find people in the social networking sites to join with you.

I know some people feel bad about MLM business and profit sharing, because of the scams that fills the internet. But there are honest and legitimate opportunities that are great and you can really make thousands of dollars with them, network marketing is a multibillion dollar industry today and yes it's still number one millionaire makers in the world.

This way of making money online is not a secret however the secret is how to do it. Today hundreds of successful network marketers knows the potential of social networking sites and they are able to generate thousands of leads from social networking sites like facebook and hi5.

So the secret way is make yourself the bait of those network marketers and try to sponsor him instead being sponsored by him.

And the only way you can do it is by promoting a new powerful network marketing opportunity.

A new opportunity that he/she did not hear about yet. Here is an example.

<http://opportunity.homewealthuniversity.com/> this is the newest opportunity on the net.

I have joined lately the [Home Wealth Opportunity](#) which is a great profit sharing opportunity with great training

products inside. This opportunity is a guaranteed success and you can know that because all top network marketers are already there, even before it officially launched.

I am involved with groups on facebook about network marketing, MLM, Home business opportunities and money making. All members of these groups are trying to connect with me and send me their offers. A simple reply like.

"Hi thank you for your message, I am new to network marketing and I appreciate your help, your opportunity sounds great and I promise I will check it out. However I have joined a new program that I think will be a success for me and I want to put some time for that program first before I look into any other. I will very appreciate your help if you know anything about this program or how can I get some fast result with it"

If you can sponsor one successful network marketer, and I have seen most of them on facebook he or she can make you earn thousands of dollars monthly alone. But to gain your opportunity need to be unique and new to the market and you need to act fast.

So I recommend you start spend some time on facebook and at least one other social networking site I also recommend [direct matches](#) where you can find almost all the network marketers there. And do not hesitate to contact them. The only tip you need to know about how to contact them is to ask for their help and only let him know about your opportunity and do not try to talk about it.

The second way to make some fast easy money online is using the answers platforms on the internet. But here I will recommend making some good research on Google using Google tools to find some popular products people search for. Then making a list of these products. Then you can join an affiliate program or affiliate network such as Click Bank. After that find some Answers platforms like yahoo answers (and there are many of them) and search only for the latest questions related to your niche. The answer these questions trying to be as helpful as you can and recommend your affiliate products.

This way of making money had proved to be very successful and very fast, and the best way to do it is by having your own review site where you review affiliate products and services, then direct people from the answers platforms to your reviews.

You can find more explanation about this method on the niche affiliate marketing website.
