# **Make Money With video upload sites, Hotfile downloads**

This is an idea to make some money online; The money you could make from this idea is great. So please read and think about it.

When I searched for a series called 24, I am sure you know it (we all know Jack Pour) I ended up with a forum with so many movies and TV shows downloads. Most of the links came from a website called Hotfile. It gives you 2 download options the free download and the premium download.

I joined as premium member and downloaded all the 24 episodes. But I noticed that you can make money with this system.

I uploaded the same episodes with better names, like 24 season 8 episode 01 (or 24s08e01), and searched for another forum to share my new links.

Within one week I have reached 39\$ from Hotfile only from one forum and one TV show. Now I am uploading movies and another popular TV shows with more forums to increase the money earned.

So what you need to do to make money this way is very simple

Join Hotfile Premium account, it's very cheap. [Click here to join](#).

Find some interesting videos and some high traffic forums to join.

Upload your videos to Hotfile, and get your links, then go to the forums and share your links for other members to download.

All the video upload sites pay you money for this action, but Hotfile pays the highest commission of all. And people can download for free and yet you will make money from their downloads.

I have shared this money making idea with a friend of mine who I know is spending most of his time on forums related to movies and TV shows, and few days later he told me that he is making more than \$50 per day from this method, I did not believe it at first, but when I learned that he is uploading adult niche videos and erotic videos, with some adult only forum I knew he is making this kind of money.

So if you are already spending some time on watching movies and TV shown and a member of some related forums it will be wise to try it.

Just get a [hotfile account](#), download your favorite videos then upload them and share.
